

Better health in just a few hours

Executive Health – Ramadan Express

Better health in just a few short hours

This Ramadan, in the spirit of giving the gift of health, Cleveland Clinic Abu Dhabi's Executive Health Program will be offering an express version of their traditional program. The Executive Health - Ramadan Express, is a more streamlined and compact health assessment, that still takes a personalized approach to your wellbeing, but over the course of three hours instead of a full day.

Cover your basic health needs

You will have access to a dedicated physician, who will assess your individual needs and analyze your results through a [45-minute initial in-person consultation](#) to discuss your results. If you need further treatment, you will be referred to Cleveland Clinic Abu Dhabi's team of highly qualified, internationally respected specialists.

Our Executive Health – Ramadan Express package includes:

- Physician consultation
- Variety of blood tests
- Nutrition consultation
- Body composition consultation
- Breathing test
- Electrocardiogram
- Abdominal Ultrasound
- Visual acuity

Prices start from 4500 AED for the Ramadan Express Program. Additional tests that may be added onto this package include a pap smear and/or 3D mammogram and/or CT calcium score (if clinically indicated) and will incur an additional charge of 1000 AED each for the pap smear and 3D mammogram and 750 AED for the CT calcium score.

Whilst we encourage you to take advantage of this exclusive opportunity during the Holy Month, our Standard and Premium packages remain available to you at any time, including Ramadan.
